H&R Consultant is a consulting company to support foreign community in Japan whose main services are relocation, visa/immigration, furniture leasing, car leasing, driver's license, cross culture training and 24 hour support. To target foreign community in Japan, client wants number of systems that can ease their back office as well as help them to grow into this market. Marg was involved in providing the technology and creative services and solutions to develop the portal. Marg provided the full service ranging from conceptualization to hosting and most of the activities were to understand the requirement, design and concept, development, and implementation. We developed number of systems for them and are now providing them 24 hour services so that they can achieve their goals more efficiently. Some of them are –

1. www.JapanHomeSearch.com

Solution

This application is developed with the Gaijin community in mind who intends to relocate into Japan. The application helps individuals and corporate request for a suitable home. The user can evaluate the home with reference to the facilities/convenience available in the surrounding areas and also see the home online prior to accepting the same. The application supports back office system to manage all the properties, making tours etc for clients and much more.

Benefits

Searching of properties from large database
Tools for users like travel expert, Map pointer etc.
Tools for admin like making tours, content management and reports etc.

Awards

This site is the winner of the Vandena Gold Award 2000 [for demonstrating excellence in real estate services] and the Results-net Five Star award. The site is number one in all search engine rankings in its domain.

2. ReloTrak System

Solution
